Foobar2000 DarkOne V3.0.1

Dec 8, 2009 CompactOne v1.0.1. This skin is included in the zip file. Q: How to get the offset from the string to the beginning of the string in Swift I was wondering if there is an easy way to get the offset from the string to the beginning of the string in Swift. For example: let str:String = "This is apple" Would return 4 for the beginning of the string. A: There are 2 equivalent methods. They are both regular expressions, but are expressed in two different ways. extension String { func offset(of str: String) -> Int { return self.range(of: str, options: .backwards)?.lowerBound } } var offset: Int { return self.range(of: self, options: .backwards)?.lowerBound } } "This is apple".offset(of: "This is") // returns 4 } } A: When you create your card you are adding it to a Deck. Then you modify its contents. When you create a second card, you are creating a new Deck. The two Decks don't match up, so you are creating a 2nd deck and within that, 2 cards. Edit: A quick fix would be to simply take the set of cards you have and put them in a list: var cards = [] func numberOfCards() -> Int { return cards.count } func numberOfCardsInDeck(deck: Deck) -> Int { return cards.count + deck.cards.count } Then replace your deck.cards.count with that method. Arise, shine for our God, The ready-willing light of day. Our weapons are weak As we are weak, He is mighty, And both of us are over. We're only losing time. We'll be saved from this mess When we shake off the dust. We are so very weak. We are the weak, but He is the strong. 3da54e8ca3
